## CorrigoPro – Invoicing App

### Submitting Invoices using the Invoicing App

- After clicking on the Invoice option in a Work Order thru CruChats, or clicking on the Invoicing App on the home page, you will be able to submit invoices using the Invoicing App
- The home page of the invoicing app has a search feature, a few filters, and the ability to download invoice templates for bulk invoice uploads. You also can update Zero-Dollar invoice settings on the Invoice App.

- Filter by the invoice **Status**, a specific **Customer**, **Branch**, **Invoice Date**, **Last Update Date**, **Type**, **Invoice By**, or Total.  
In order to submit an invoice, it must be in completed status, so you may need to check in/out.
- All columns with the exception of **Action** can be used to sort invoices – alphabetically or numerically.
- Click on the  icon to get to Settings.  
From here you can toggle on or off the ability to Auto-Submit Zero Dollar Invoice.

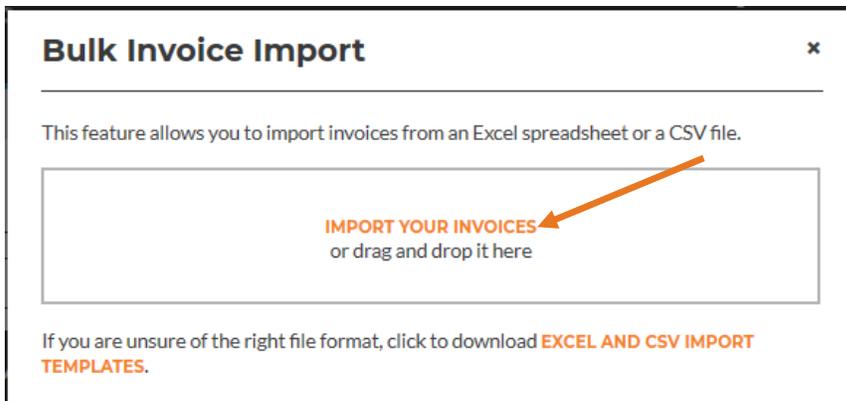

- To submit invoices in bulk, click on **DOWNLOAD INVOICE TEMPLATE** to get a template to help guide you in your import.
- After you have reviewed the template you can select multiple Work Order numbers on the homepage of the Invoicing App so that you get the options to **Export, Reset,** or **Submit** those invoices en masse.

If you click **RESET** it will “reset” the invoice, meaning it will erase everything currently on the invoice.

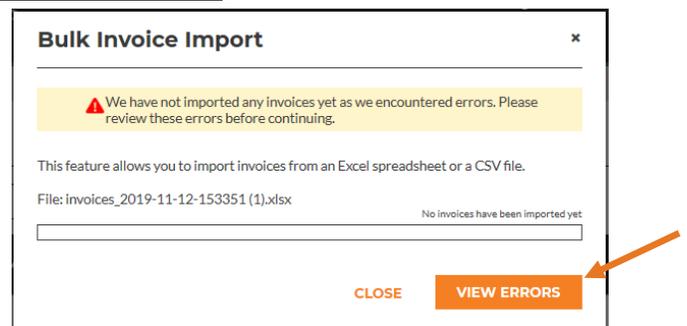

- Click Export to bring the current invoices into a spreadsheet and fill out the appropriate blank fields to import back en masse.

- To import invoices en masse, after you edit, and save the file as seen above, click the **IMPORT INVOICES** button at the top of the homepage on the Invoicing App.
- Upload the saved invoices document on the pop up.

- If you have any errors on your import, you will receive the following error screen. Click on **VIEW ERRORS** to identify what the issues are for this import.

- The Bulk Invoice Import Errors page will tell you exactly what is wrong with each individual row in your import, and let you know how many invoices on the sheet can still be imported, if you choose to continue.
